THE SCIENCE OF IMPROVING LIVES

Session Objectives

By the end of this session, participants will have:

- Understood the rationale for having a LogFrame
- Defined key LogFrame components
- Reviewed guidelines to strengthen LogFrames

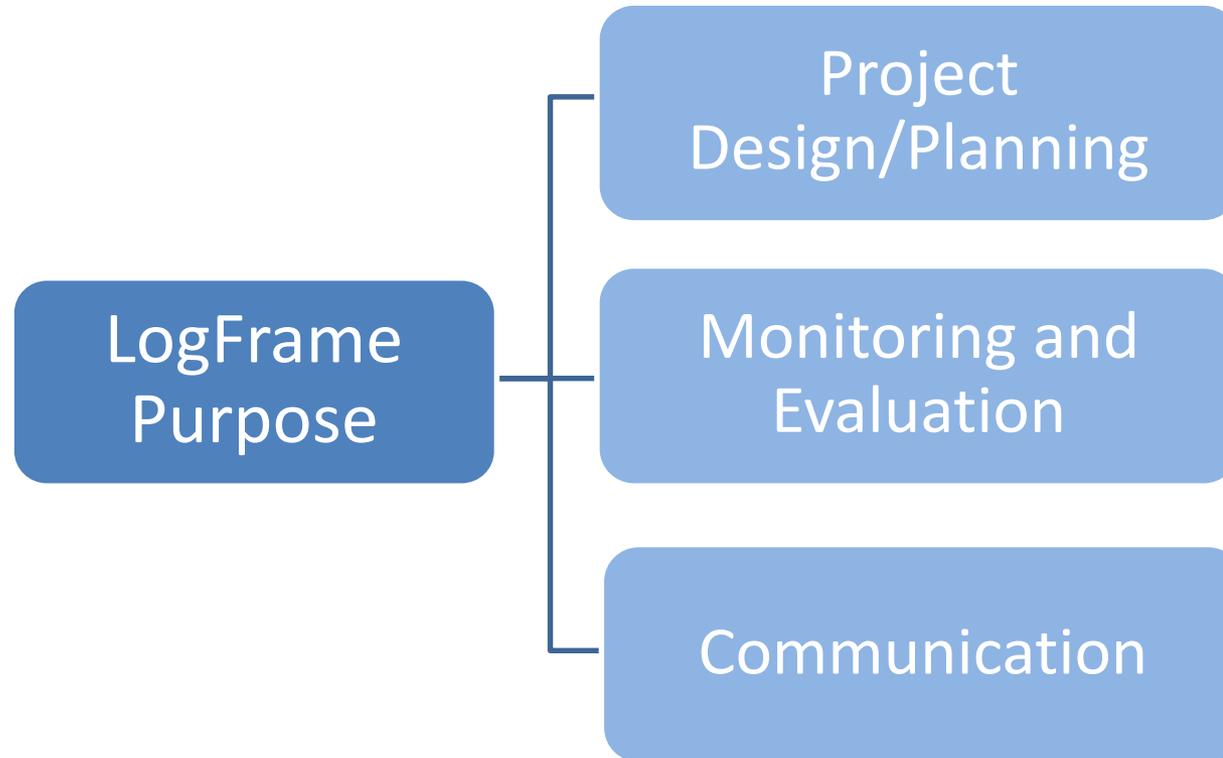

What is a LogFrame?

“A rigorous methodology used for project design that focuses on the causal linkages between project inputs, outputs, and desired outcome (or purpose)” (USAID Automated Directives System [ADS])

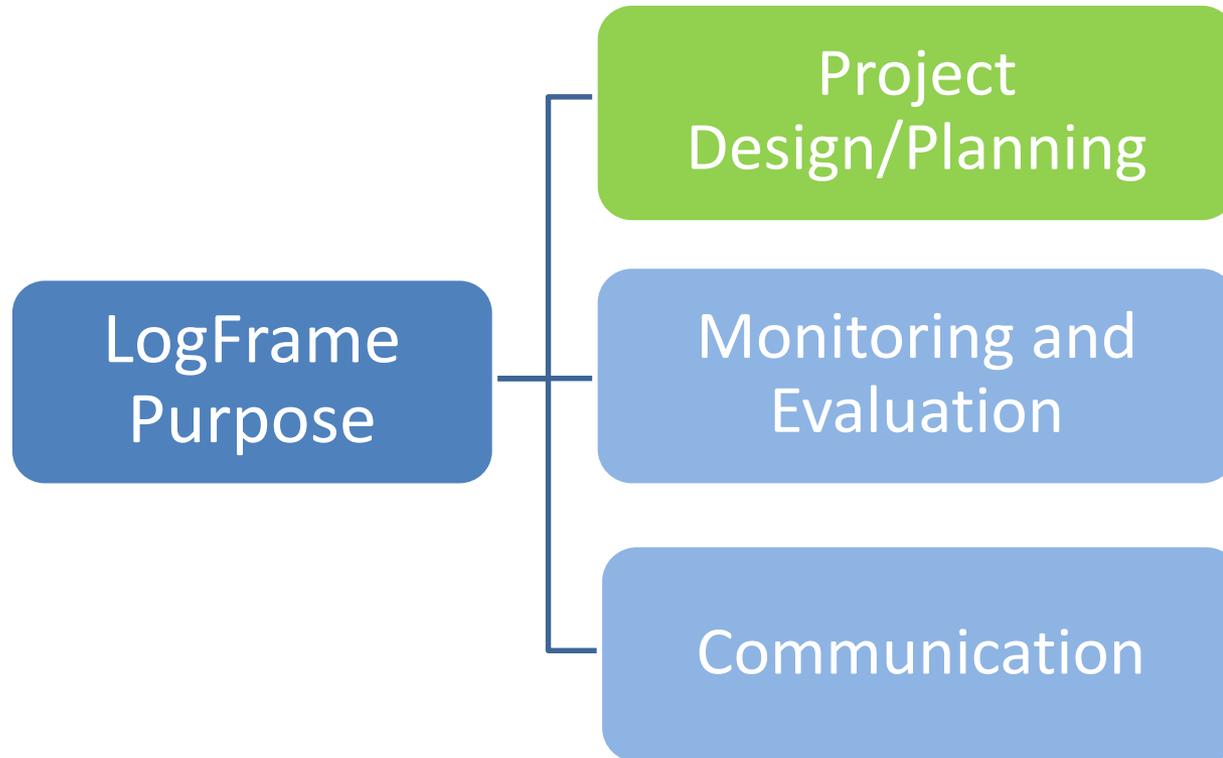

What is a LogFrame?

- Fosters a clearly stated, explicit, and measurable description of what will happen if a project is successful
- Clarifies what the project is responsible for accomplishing and why
- Displays key project elements and their relationship to each other to facilitate analysis, decision-making, and measurable impact

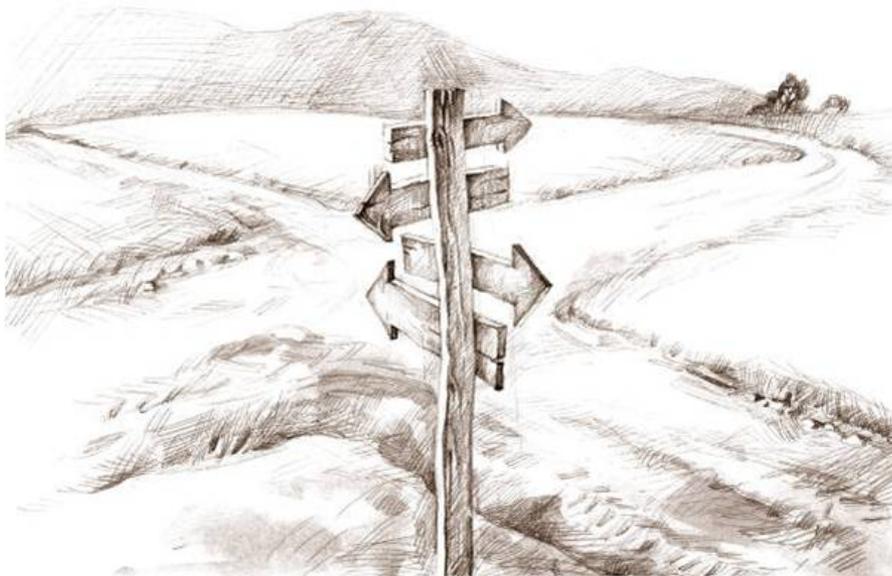

What Are the Basic Purposes of LogFrames?

What Are the Basic Purposes of LogFrames?

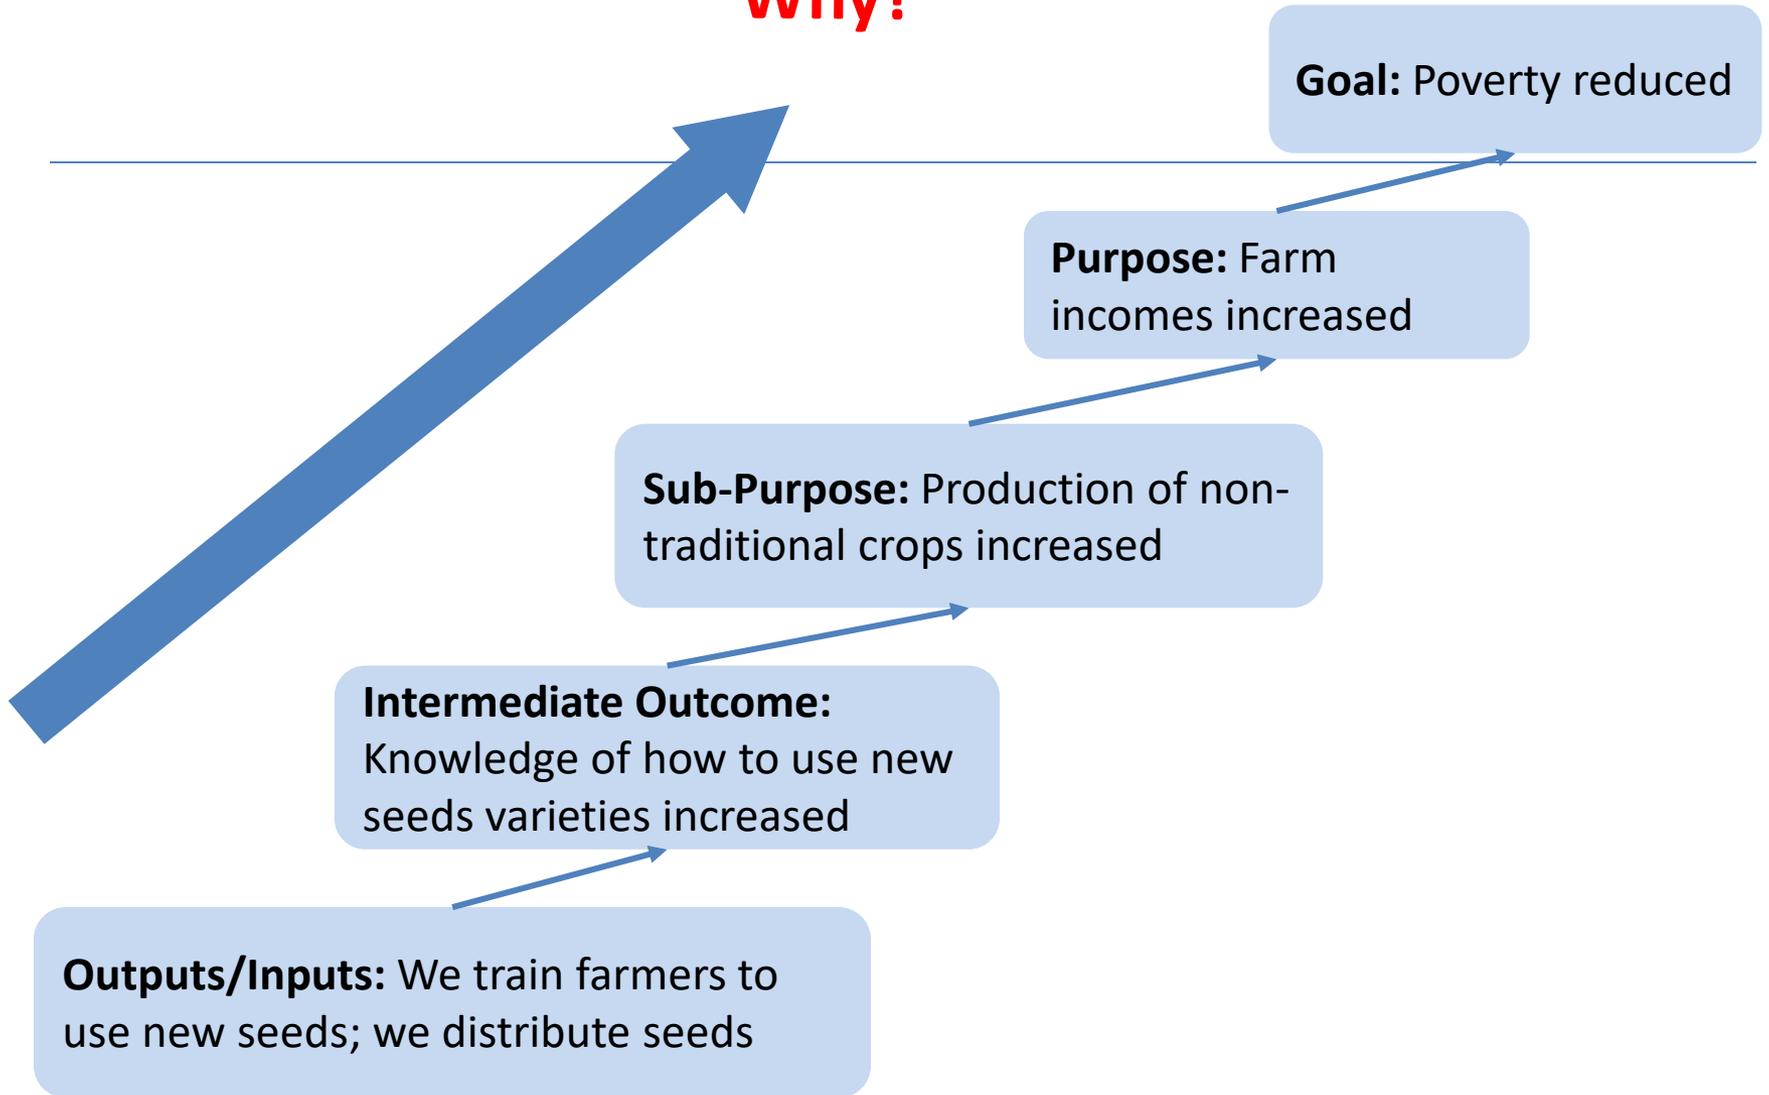

Some Projects Lack a Clear View of Their Destination

*“If you don’t know
where you’re going, any
road will get you there.”*

*–Lewis Carroll,
Alice in Wonderland*

Why?

Goal: Poverty reduced

Purpose: Farm incomes increased

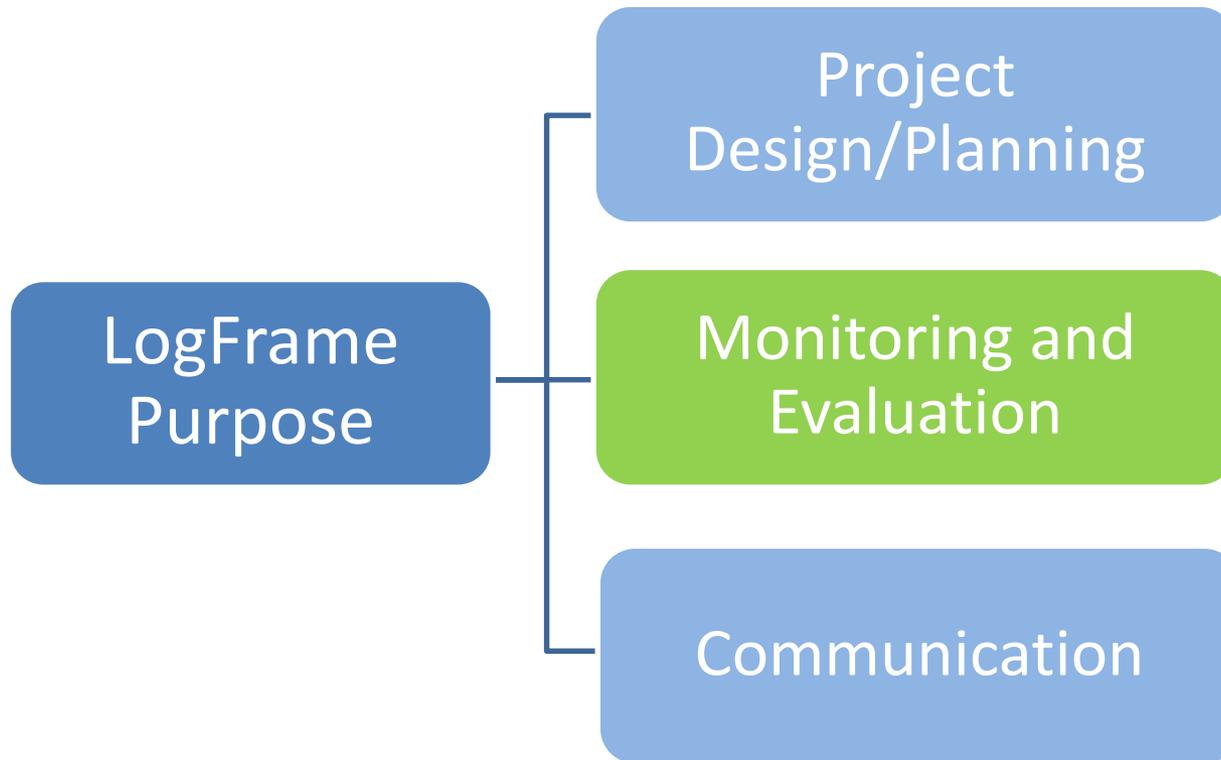

Sub-Purpose: Production of non-traditional crops increased

Intermediate Outcome: Knowledge of how to use new seeds varieties increased

Outputs/Inputs: We train farmers to use new seeds; we distribute seeds

How?

What Are the Basic Purposes of LogFrames?

Approximate Correlation Between LogFrame and Indicator Levels

Impact and Outcome Indicators

- Goal
- Purpose

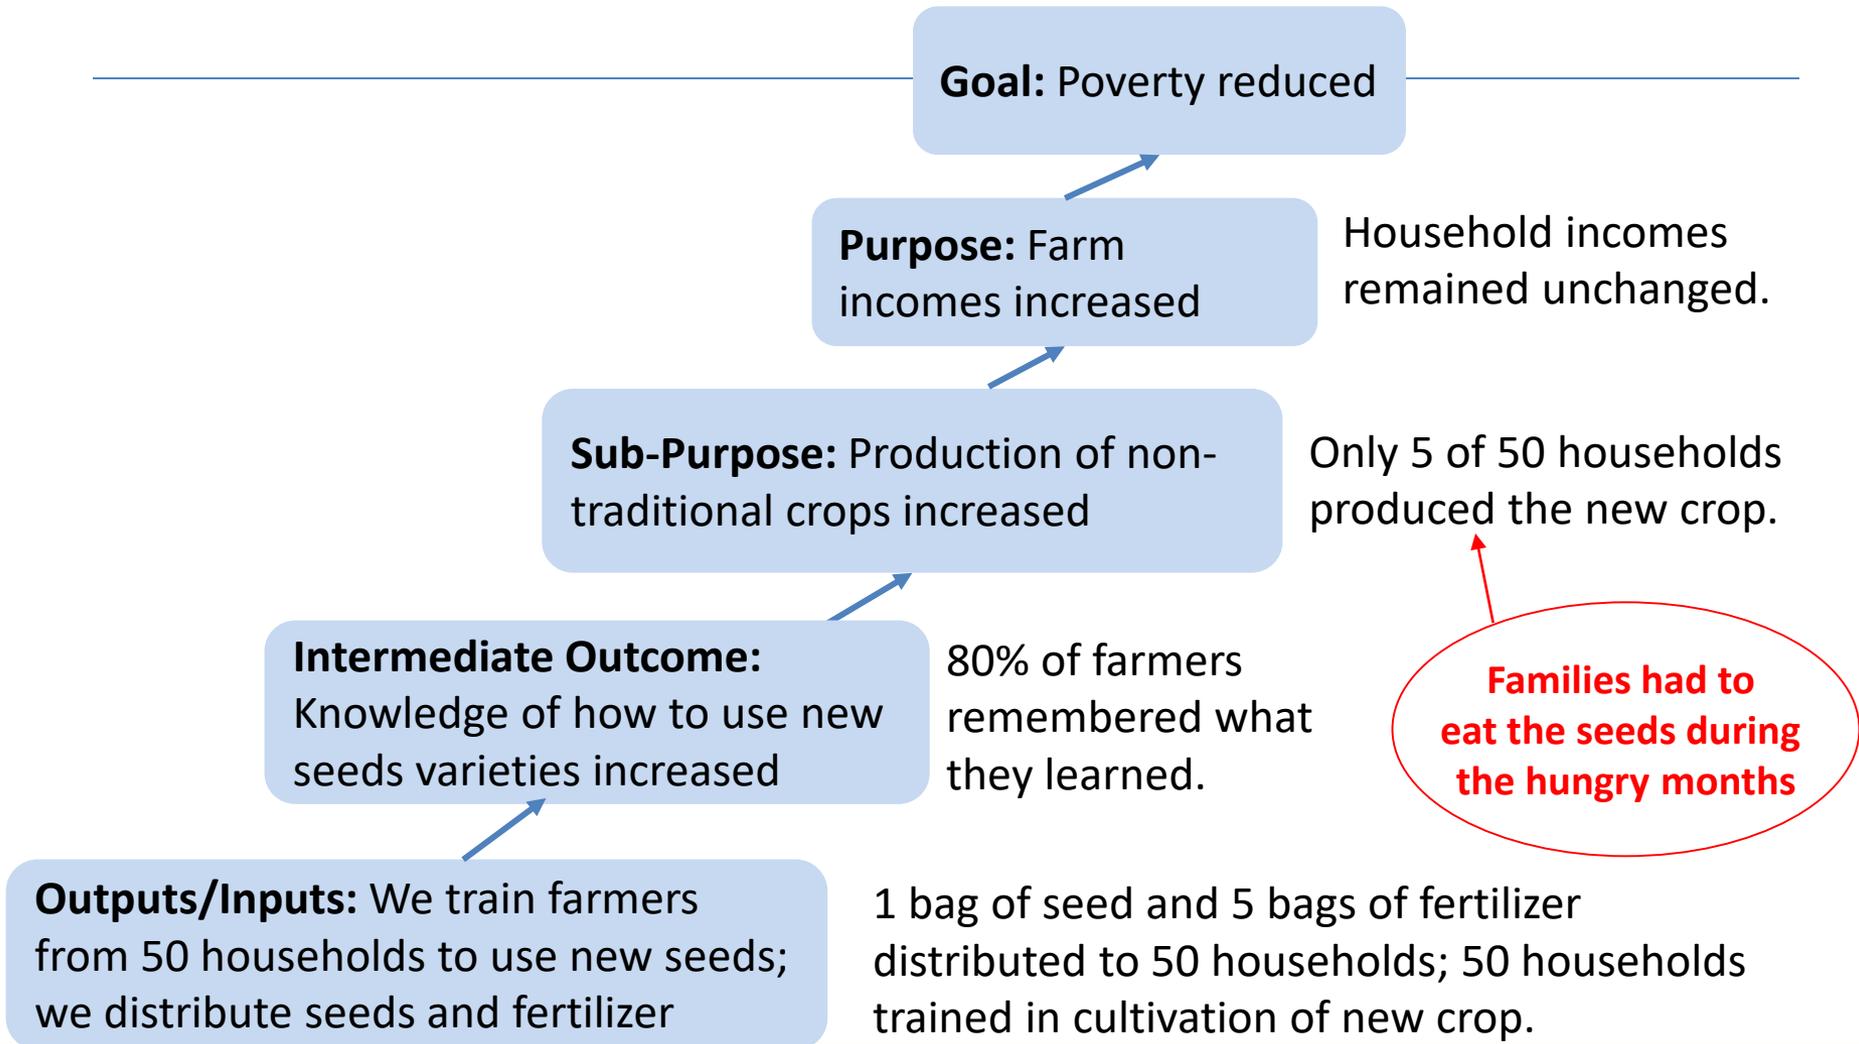

Outcome Indicators

- Sub-purpose
- Intermediate outcomes

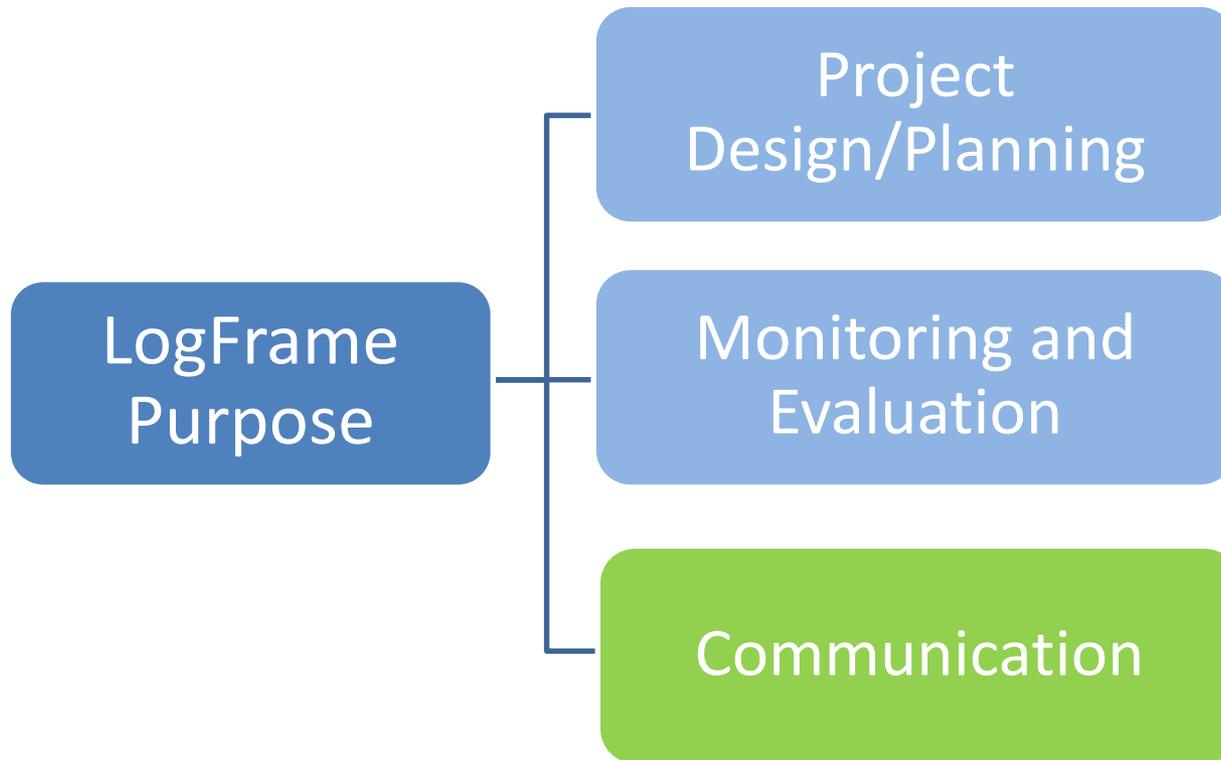

Output and Process Indicators

- Output
- Input

Monitoring at Every Level Helps Pinpoint Where a Barrier May Exist

What Are the Basic Purposes of LogFrames?

LogFrame Components

	Narrative Summary	Indicators (with targets)	Data Sources	Assumptions
Goal				
Purpose				
Sub-Purpose				
Intermediate Outcome				
Output				

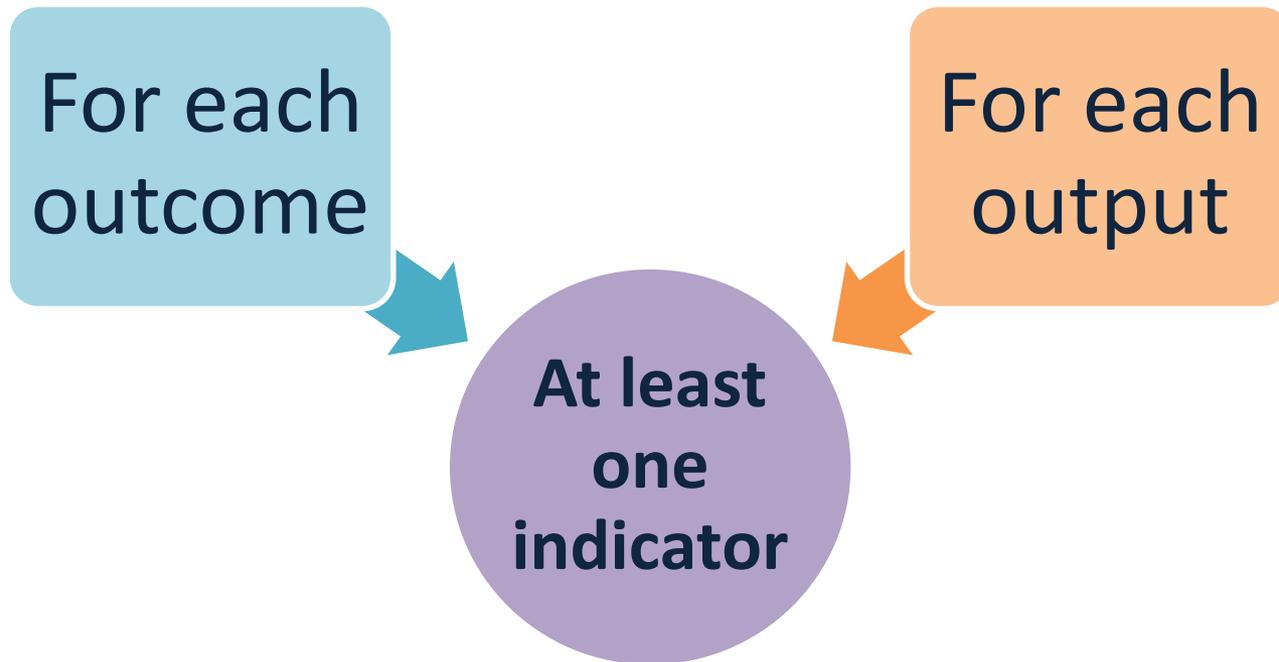

LogFrame Components: Narrative Summary

Outlines ToC
components for
which project is
responsible

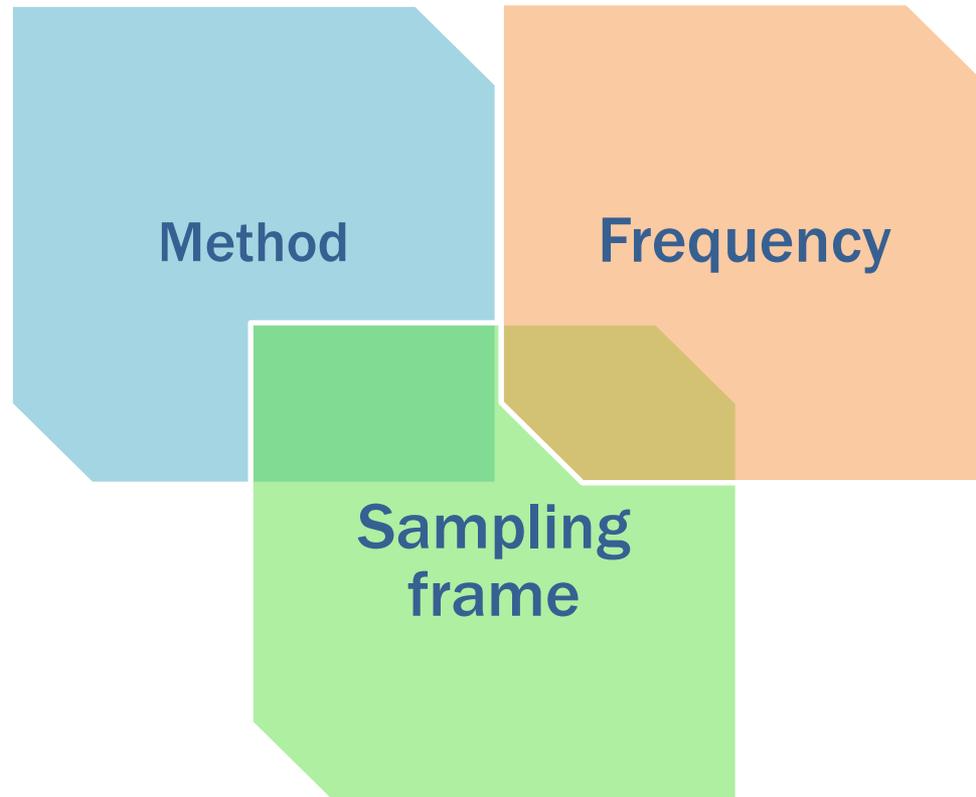

Takes
language/
sequence
from ToC

Complete
each
purpose

LogFrame Components: Indicators

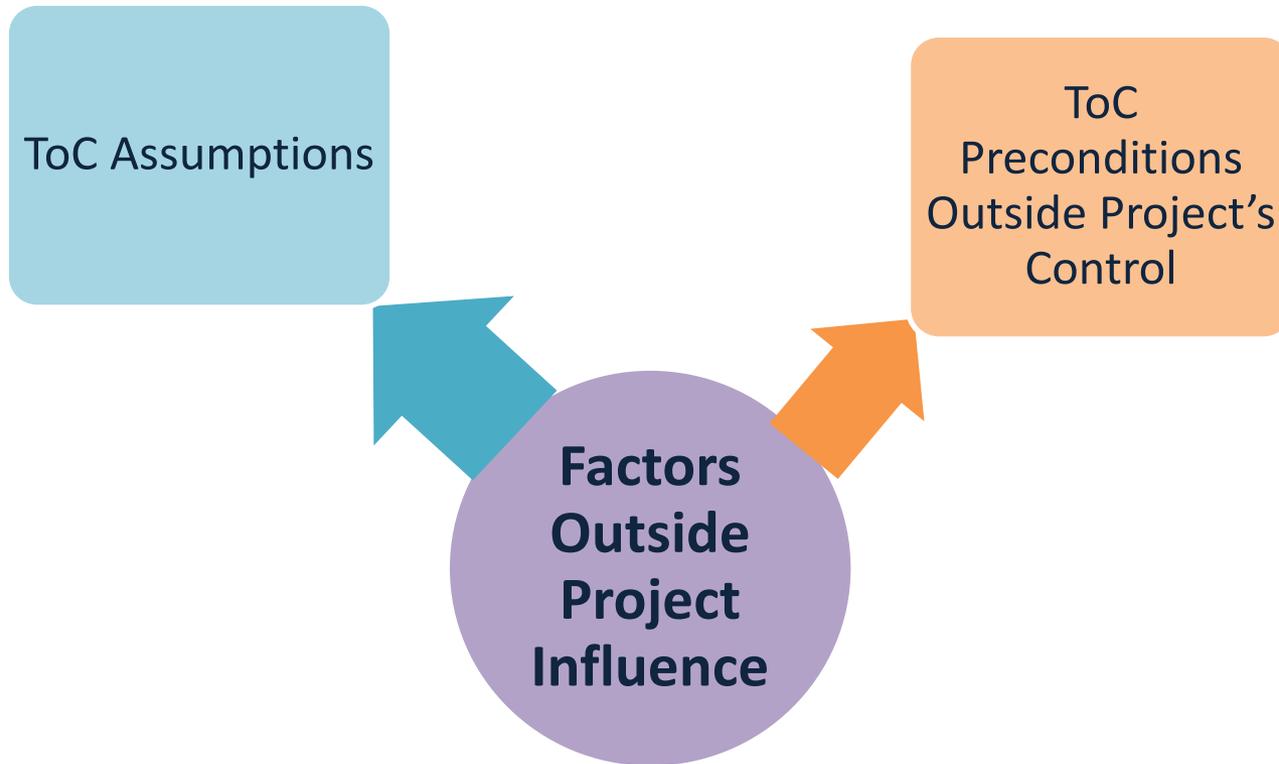

LogFrame Components: Data Sources

LogFrame Components: Data Sources—Example

“Annual survey of beneficiary communities”

LogFrame Components: Assumptions

Assumptions

Specific and measurable
(if possible)

Verify validity

Assess importance

Evaluate risk

Mitigate risk

Monitor changes in the status
of the assumption

Theory of Change and LogFrame

The LogFrame must:

- Be consistent with the ToC
- Use the same sequence, hierarchy, and language to organize outcomes/outputs
- Capture ToC purposes that the project will be responsible for

Theory of Change and LogFrame

The LogFrame cannot:

- Depict all ToC pathways (e.g., sub-purposes that contribute to more than one purpose):
- Show where ToC elements make the greatest contribution or where they are most critical
- Show interdependencies of same-level outcomes

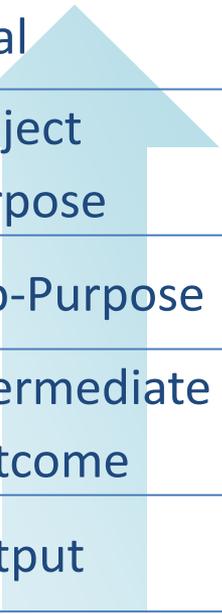

Theory of Change and LogFrame

- ToC contains all project outputs.
- LogFrame can omit outputs that are limited in number and will be produced in a short period (e.g., market analyses conducted during the project's first year).

Activity 1: LogFrames

Key Definitions (30 min. total)

	Narrative Summary	Indicators	Data Sources	Assumptions
Goal				
Project Purpose				
Sub-Purpose				
Intermediate Outcome				
Output				

Activity 2 (50 min. total)

- You may work alone or in pairs.
- In your folder, find the Activity 2 worksheet.
- On the worksheet, we have listed principles of sound LogFrame construction (see the LogFrame Checklist included in your materials). Beneath each principle, we provided two examples. One example correctly demonstrates the principle. The other is incorrect. Circle the correct example (A or B). (20 minutes)
- After you finish, we will reconvene as a group. We will ask for one volunteer per question to share their answer and explain the reason for their selection. (30 minutes)

Resources

- Excerpt from ADS (Automated Directives System) Chapter 201: Planning

USAID
FROM THE AMERICAN PEOPLE

This presentation is made possible by the generous support of the American people through the support of the Office of Health, Infectious Diseases, and Nutrition, Bureau for Global Health, and the Office of Food for Peace, Bureau for Democracy, Conflict, and Humanitarian Assistance, United States Agency for International Development (USAID) under terms of Cooperative Agreement No. AID-OAA-A-12-00005, through the Food and Nutrition Technical Assistance III Project (FANTA), managed by FHI 360. The contents are the responsibility of FHI 360 and do not necessarily reflect the views of USAID or the United States Government.
