

LogFrames Activity 2: Key Concepts to Strengthen Your LogFrame

Instructions

1. You may work alone or in pairs.
2. Below, we have listed principles of sound LogFrame construction (see the LogFrame Checklist included in your materials). Beneath each principle, we provide two examples. One example correctly demonstrates the principle. The other is incorrect. Circle the correct example (A or B). (20 minutes)
3. After you finish, we will reconvene as a group. We will ask for one volunteer per question to share their answer and explain the reason for their selection. (30 minutes)

1. LogFrame should follow causal logic

A.

Purpose 1: Vulnerability to disaster reduced among target populations

Sub-Purpose 1.1 Access among vulnerable populations to DRR infrastructure increased

B.

Purpose 1: Infrastructure support systems strengthened

Sub-Purpose 1.1 Access among vulnerable populations to DRR infrastructure increased

2. Results statements should be clear, meaningful, specific, measurable, and feasible

A.

Children safe from physical, psychological, and sexual abuse and neglect.

B.

To maximize the capabilities of professional staff and use taxpayer resources wisely while engaging in therapeutic interventions and case management processes so that children's development capacities are unencumbered by adverse environmental circumstances of experiences.

3. Results should *cause* the level above it, not *define* it

A.

Healthier Families (Purpose)		
Healthy Moms (Sub-Purpose 1)	Healthy Dads (Sub-Purpose 2)	Healthy Children (Sub-Purpose 3)

B.

Healthier Families (Purpose)		
Improved Quality of Health Services (Sub-Purpose 1)	Increased Access to Health Services (Sub-Purpose 2)	Improved Health Practices in Household (Sub-Purpose 3)

4. Purpose and Sub-Purpose should say different things

A.

Purpose	Human health related to nutrition, potable water, and health education improved
Sub-Purpose	Knowledge of appropriate WASH practices increased

B.

Purpose	Human health related to nutrition, potable water, and health education improved
Sub-Purpose	Health and nutritional status of children under 5 years of age and women of reproductive age improved

5. Purposes, Sub-Purposes, and/or Intermediate Outcomes should not be inverted

A.

Purpose 1: Increased crop production
Sub-Purpose 1.1 Food security of resettled households is protected
Sub-Purpose 1.2 Improved MOA agricultural extension services to target households

B.

Purpose 1: Food security of resettled households is protected
Sub-Purpose 1.1 Increased crop production
Sub-Purpose 1.2 Improved MOA agricultural extension services to target households

6. Results statements should be uni-dimensional: Different levels should not be crammed into one result

A.

PROJECT A's Purpose:
Enhance and protect livelihood strategies **through** sustainable improvements in agriculture, animal husbandry, and NRM practices

B.

PROJECT B's Purpose:
Livelihood strategies enhanced and protected

7. Capacity building is a means to an end; that end is what should usually appear in Purposes and Sub-Purposes

A.

Purpose	The capacity of communities to manage risks and cope with shocks resulting from vulnerability will be strengthened
Sub-Purpose	The capacity of food security committees in the prevention of risks and shocks is reinforced

B.

Purpose	Communities manage risks and cope with shocks
Sub-Purpose	The capacity of food security committees in the prevention of risks and shocks is reinforced
