THE SCIENCE OF IMPROVING LIVES

Session Objectives

By the end of the session, participants will have ...

1. Learned the importance of annual monitoring
2. Understood the different categories of annual monitoring indicators
3. Discussed which indicators are applicable to their projects
4. Considered how they will collect annual data

PART 1 OF 2

Introduction to the FFP Annual Monitoring Indicators

Indicator Revision Process

Indicator Categories

CATEGORY		
Agriculture and Livelihoods		
Resilience		
Maternal and Child Health and Nutrition (MCHN)		
WASH		
Gender		

Output Versus Outcome Indicators

	TOTAL NUMBER
Output	27
Outcome	15
TOTAL	42

Indicator Types

TYPE	TOTAL NUMBER
Required (R)	4
Required if Applicable (RiA)	38

Total of 42
annual monitoring indicators

Required (R) Indicators

“Required for all FFP
development food assistance
projects”

Required (R) Indicators

1. Number of households benefiting directly from USG assistance under Food for Peace
2. Percentage of participants in USG-assisted programs designed to increase access to productive economic resources (assets, credit, income or employment) who are female
3. Number of vulnerable households benefiting directly from USG assistance
4. Number of rural households benefiting directly from USG interventions

Required if Applicable (RiA) Indicators

“Required for all development projects that have relevant interventions”

Example of an RiA Indicator

Is your project promoting value chain activities?

Example: Farmer's gross margin per hectare, per animal or per cage obtained with USG assistance

RiA: Another Example of Applicability

Are you increasing access to credit through financial institutions?

Example: Value of Agricultural and Rural Loans as a result of
USG assistance

Activity 1: Identify Applicable RiA Indicators (25 min.)

- Sit with your project teammates for this exercise.
- Read applicability criteria for each RiA indicator.
- Ask yourselves: Is your project required to collect this indicator?

Where to Find Guidance

PART 2 OF 2

Data Collection for the FFP Annual Monitoring Indicators

Who's Responsible?

Data collection for annual monitoring indicators is the responsibility of the Awardees

Methods of Data Collection

How to collect data for annual monitoring indicators:

1. Routine monitoring
2. Beneficiary-based survey

FFP Recommendation

Use routine monitoring
(whenever possible)!

Appropriate Scenarios for Beneficiary-Based Surveys

Large project size/inadequate data collection staff

Difficult to achieve ideal of visiting **all** beneficiaries with routine monitoring

Farmer recall/estimation potentially unreliable under certain circumstances; direct measurement preferred

Example: measuring hectares

Lack of direct contact between project and beneficiary farmers

Example: contact with outside agricultural organizations under a market facilitation approach

Activity 2: Discuss Data Collection Methods for Annual Monitoring Indicators (25 min.)

- Sit with your project teammates for this exercise.
- Discuss activity questions.
